TEXT TEXT:

field of wheat they had grown themselves.

The paper broke the "story" about a month ago, then tested two *acknowledged UFO experts by taking them to the site. Not only were they fooled but they were very excited by a hole made by a steel spike used in the hoax, which they took to be evidence of one specific type of alien craft.

KOMSOMOLSKAYA PRAVDA says it set out to prove that these *phenomena can be hoaxes. If flying saucers can experiment on

people, the paper says "why can't journalists experiment on ufologists?"

Stay young, don't drive

Driving can make you old before your time, according to research done in St Petersburg. ROSSIYSKAYA GAZETA reports that the Institute of Bioregulation and Gerontology in the city has been doing research on the effect of the work you do on the decline of mental powers in specific groups.

The institute compared a group of lorry drivers and machine operators, paired by age, length of service, family circumstances and education and was amazed to find that the drivers aged much faster than the factory workers.

While the machinists all showed a decline in mental ability after 60, the drivers showed the same decline earlier. Those who had been driving for 20 years had the same mental decline as the factory workers at 60.

The conclusion is: "Don't spend a long time at the wheel and change your job," ROSSIYSKAYA GAZETA says. The paper adds that no-one knows why this happens but speculates it might be the result of long periods alone in the cab.
