UFO Sighting Questionnaire N 1
General Cases (Form 1)

Name of investigator: Marina Stolyarskaya, Galina Troshkova.
Street address: zapovednik
Town: Lodeynoye Pole. Region: Leningradsky. Zip code: 187710
Country: Russia

Information on Observer

Name of Observer: Guriy Anikin
Age (birthday): 1941
Profession: traktor driver
How many other witnesses? 1 (Jevgeny Terentjev, 1957, worker).
Did any other Agency contact You? No

Sketch of the object: enclosed
Sketch of the area: enclosed

Personal Account:

1. Where were you and what were you doing at the time? Were fishing in the boat
2. What made you first notice the object? Begin to watch with the partner
3. What did you think the object was when you first noticed it? Somewhat unusual
4. Describe your reactions and actions, during and after sighting the object. Got quiet
5. Describe the object and its actions.

1) In NE(E) direction appeared very bright "headlight". It gave straight shaft of light to direction of observers. Gradually light increased, got more intensive. Then spiral cloudy traces begun appeared in the sky (from below upwards). When observers had returned in 5 hr, these traces were in the sky yet. This phase took about 0.5 hr.

2) "Headlight" begun to move away. Suddenly (impulse) appears dark square (see picture) with flutes on the sides. - All these took 5 min.

3) Very slowly object went down and disappeared. - 5 min. On the sky remained spiral traces.

Comment

Other witness noticed 15 grad. to the N one more straight light without "headlight".

Week before of this case he watched big star in SEE direction 20-25 grad. higher line of horizon. It shone 5 min, then disappeared.

Next day after this case the girls from village saw fireglobe

from the direction of Karelia.

Analogic case (with "headlight") observer watched in Apatiti (town to the North).

Place of sighting: on the river Svir opposite mouth of gulf Lachta, 2 km below willage Gorka

Date of sighting: beginning of August 1996

Sighting time: 1 hr 40 min (night)

Durations: appr. 40 min

Enviromental Situation:

Town: Lodeynoye Pole. Region: Leningradsky. Zip code: 187710
Country: Russia

Information on Observer

Name of Observer: Vasilij Vichkunin
Age (birthday): 1947
Profession: chief forest inspector in reserve
How many other witnesses? no
Did any other Agency contact You? No

Sketch of the object: enclosed
Sketch of the area: enclosed

Personal Account:

1. Where were you and what were you doing at the time?

I went on motorboat along Lachta-gulf to Lachta station (hauses). There was dark.

2. What made you first notice the object?

I continued to move in the boat.

3. What did you think the object was when you first noticed it?

That it was "headlight" of autocar.

4. Describe your reactions and actions, during and after sighting the object.

Before sighting I felt any anxiety, then - fear. I continued to feel fear for several hours after it. Actions - see below.

5. Describe the object and its actions.

I went on motorboat along Lachta-gulf to Lachta station (hauses). There was dark. Suddenly I felt any anxiety, then - fear. After that I saw in N direction strong ray of light. I thought, that it was "headlight" from auto. But there was no road there (only thick forest). The ray was direct vertical upwards, then slowly passed down in E direction. I slept in the house near (m.b. 300 m) the place, ^{where} I saw it. Fear don't leaved me for several hours. Several times I went out to look that direction, but there was nothing more. Next morning I enter the place, where, to my mind, was the object, but nothing had seen. I wrote about it in me diary.

Place of sighting: gulf Lachta, square 61-62 (see map of reserve)

Date of sighting: 19.10.90

Sighting time: 20 hr

Durations: < 1 min

Information on Observer

Name of Observer: Jurij Jeremejev
Age (birthday): 1972
Profession: forest inspector in reserve
How many other witnesses? about 30 (Nicolaj Kokorin,
Bladimir Shilov and so on)
Did any other Agency contact You? No

Sketch of the object: enclosed
Sketch of the area: enclosed

Personal Account:

1. Where were you and what were you doing at the time?
2. What made you first notice the object?
3. What did you think the object was when you first noticed it?
4. Describe your reactions and actions, during and after sighting the object.
5. Describe the object and its actions.

8.08.91 I was at home, then went out to smoke. My attention attracted light cloud in NNE part of the sky. I begun to observe, then brought the binocular from house and watch with it. First thought was: Why this cloud shines and how it appears? I felt interest and excitation.

First was one shiny cloud of light-blue color. Its elevation was about 45 grad. Then appeared "8" - two rings of the same color. Then from the centre of the "8" appeared two globe lights: one of green, another of red color. They stoped in the air appr. 10 sec, then begun to move from cloud to the line of horizon in East direction. They moved smoothly, with the constant distance between them. When they were about 30 grad. above line of horizon, I finished my observation. The cloud shone till morning.

I watched analogic phenomenon also at 1992, 1994, 1996. In august 1996 early morning from E to N, to the shiny cloud, moved red globe. It emited rays of light, similare to projectors. Globe got the cloude and disappeared. Later in the morning cloud was distroyed by the wind.

According to my data, about 30 persons in Svirskoje independently saw these phenomenon from 1990 till 1996 ys.

Place of sighting: Svirskoje (NE part of reserve)

Date of sighting: 8.08.91
(also 1990, 1992, 1994, 08.96)

Sighting time: 23 hs 50 min

Durations: 8-10 min

Enviromental Situation:

UFO Sighting Questionnaire N 4

General Cases (Form 1)

Name of investigator: Marina Stolyarskaya, Galina Troshkova.

Street address: zapovednik

Town: Lodeynoye Pole. Region: Leningradsky. Zip code: 187710

Country: Russia

Information on Observer

Name of Observer: Sergej Lasarev

Age (birthday): 1954

Profession: kapitan-mechanic of adjusting ship "Zaplya"

How many other witnesses? 3 (1 - Sergej Kukuza, 2 - watchers from ship "Rodina", they connect with radio at the moment)

Did any other Agency contact You? No

Sketch of the object: enclosed

Sketch of the area: enclosed

Personal Account:

1. Where were you and what were you doing at the time?

2. What made you first notice the object?

3. What did you think the object was when you first noticed it?

4. Describe your reactions and actions, during and after sighting the object.

5. Describe the object and its actions.

We passed up the river Svir and were opposite mouth of the gulf Lachta. In that moment we were in divergence with other ship-"Rodina" and connect with it with radio after saw the object. We use binocular.

In E, near horizon, above the forest appeared bright star. During 20-30 sec it increased, like it brought nearer. Appeared bright round spot, size of 1/4 of Moon. To determine distantion to object is impossible. Shining was bright, white, clear. After that from the sides of spot appeared 6 symmetric rays. They were like traces of shiny smoke or steam from nozzle. In this moment the object seemed to be unmoving. Then spot disappeared. In that place formed cloud, its size was much more then Moon. In 10-20 sec on the edge of cloud again appeared the star of former size. It begun to move away (unright zigzag), decreasing in size. In 20 sec it disappeared.

Shining of cloud were watching in the dark about 2 hs after that. Then it dispersed. Cloud was, supposedly, in higher layers of atosp- here, because the ship moved, but the direction to cloud remained always E.

Analogic phenomenon saw ones more in a year. It was in september, before sunrise. The difference: 1. the cloud formed from disk without rays, 2. during moving away after the star stayed cloudy trace, which remained on the sky like airplane trace. All traces disappeared from view with sunrise, in 5.30-5.40.

Place of sighting: river Svir opposite mouth of the gulf Lachta

Date of sighting: beg.-middle of July 1988 or 1989

Information on Observer

Name of Observer: Alexander Molchanov
Age (birthday): 1953
Profession: driver
How many other witnesses? 1 (Vas. Kochetkov, nephew)
Did any other Agency contact You? No

Sketch of the object: enclosed
Sketch of the area: enclosed

Personal Account:

1. Where were you and what were you doing at the time?

We were going to fish, unpacked nets.

2. What made you first notice the object?

Stayed and saw on it.

3. What did you think the object was when you first noticed it?

First - did not understand, then - UFO.

4. Describe your reactions and actions, during and after sighting the object.

During sighting we watch quietly, after - take off nets and went away (was unpleasant feeling).

5. Describe the object and its actions.

We were going to fish, unpacked nets. First from the forest behind us was heard muffled metal knock (in the same direction appeared then globe). Knock continued several hrs (1-2 or >) with large intervals (20 min?). Then I saw globe red from sunside and dark from other side, which raised up the forest. It raised on the height about 1 km, hanged for several minutes. Then it made circle above the place it hanged and stoped for a little more time. Then it begun to move away quickly to the direction of Lodejnoje Pole. The speed was > car, but < airplane. Trajectory was absolutly straight. During the moving behind and around globe were seen (under that illumination) somewhat, resembled interrupt air waves (see picture).

Place of sighting: 1.5 km to NW from boundary of reserve in the line of Ladoga-beach

Date of sighting: last decada of august 1991

5. Describe the object and its actions.

I went out the house in twilight to listen to woodcock. In W direction I noticed red phosphorescent ellipse, which slowly noiselessly vertically raised up the glade, as seemed, in the centre of island (in 0.5 km from me). It raised in-front of forest, which grows behind small stream in 1 km from my house. On the highth about 20-30 m it stoped and begun to move slowly horizontally in N direction. It flied, as seemed, just above the top of forest.

I went out my house. In NE direction I noticed somewhat, resembled a part of very bright new moon, put out the cloud. I surprised, because I knew, that the almost full moon must be now in South. In 1-2 min down the object fell clear conical ray of white light. All this was unmoving. In 5 min everything disappeared in the same time. I had thought, that this phenomenon connect with space-vehicle launching site (kosmodrom) in Pleseck.

Place of sighting: NSreserve, ornitological statin Gumbarizi

I woke up in 3 hr of night from bright light, as in windows falls strong ray of headlight. I went out to see - what the car is it? Outdoor I surprised very much to very bright light, it was lik daylight, sunlight. Above I noticed nothing. The light fell only on my house, yard and part of the road (rad. approx. 70 m). All around was dark. I didn't understood what was it. In 15-20 min I went away to sleep. Indoor I saw, that light graduatelly decreased. I didn't felt fear, didn't notice anything unusiall at night and at morning.

How many other witnesses? no
Did any other Agency contact You? No

Sketch of the object: enclosed
Sketch of the area: enclosed

Personal Account:

1. Where were you and what were you doing at the time?
2. What made you first notice the object?
3. What did you think the object was when you first noticed it?
4. Describe your reactions and actions, during and after sighting the object.
5. Describe the object and its actions.

I went to corridor (from the room of my house) to drink water. I noticed from the window of corridor, that in NE appeared globe. It seemed to be under village Ruch'i (destroyed village). It was red. Around it was bright red-white shining. It moved smoothly and wavy. Moving to E, globe gave straight ray of light, like projector, of intensive pink color. It was directed just to window of my corridor. Light increased, like it was directed, brought on my window. I felt fear. Globe turned to NE again (bit to N of the place, where appeared) and dissapered behind horizon (in 3-4 min). During moving away the color of globe turned pale to pale-pink, but shining (glow) remained 0.5 hr yet.

Place of sighting: NSReserve, vill. Kovkenizi

Date of sighting: late autumn 1994

Sighting time: 22 hr

Durations: 3-4 min

Enviromental Situation:

Viewed from: Outdoors() Indoors(+) Car() Boat() Other

Viewed through: With the naked eye (+) Glasses() Window()

Binoculars () Other

Sky Condition: Clear() Partly Cloudy() Overcast(+) Foggy()

Heavy() Medium() Light()

It was cold.

5. Describe the object and its actions.

We were sitting on hayloft in the garret wenn noticed 3 globes of different size in NE direction, above the forest. We were surprised very much and watched with interest. They seemed to be 1.5-2 m in diameter, of intensive red color, shiny. They moved smoothly, but rather fast appr. 4-5 m above the forest in E direction and in 5 min disappeared in NEE behind horizon.

Place of sighting: vill. Kovkenizi

Date of sighting: beg. of august 1988 or 1989

Sighting time: late evening

Durations: 5 min

Enviromental Situation:

Viewed from: Outdoors() Indoors() Car() Boat() Other garret of house, hayloft

Viewed through: With the naked eye (+) Glasses() Window()

I was fishing in the boat opposite mouth of Lachta-gulf. Suddenly in NE appeared white trace, as after reactive airplane, but it appeared not straight, but twisting. The object seemed as oblong shiny (in sunlights?) point. It moved from above down the Earth. In 3-4 min point went out, may be because the sun set at all.

Place of sighting: NSReserve, near mouth of Lachta-gulf

Date of sighting: august 1993

Profession: captain-mechanic
How many other witnesses? 4.- One mate. Three watchers from the other threedecker motor ship "Rodina". It went downstream r.Svir. They told over the transmitter, when they were watching UFO.
Did any other Agency contact You?- No

Sketch of the object: enclosed
Sketch of the area: enclosed

Personal Account:

1. Where were you and what were you doing at the time? Navigated motor ship "Bekas" upstream r.Svir. I was in a deck cabin when the objects appeared.
2. What made you first notice the object? Called to mate from the room. Asked to watchers from ship "Rodina" about objects. Sighted the object with curiosity.
3. What did you think the object was when you first noticed it? Somewhat unusual.
4. Describe your reactions and actions, during and after sighting the object. I started to watch it through binocular. But I couldn't tune it into the sharpness, in spite of contours of objects seemed clear-cut.
5. Describe the object and its actions. First three stars appeared. They came nearer and increased. The light became bright like a kindled fire. Each of objects has three windows with light-pink rays from it. (I could see it through binocular). Rays were directed down, conical dilated and were short like they were cut. All 3 UFO seemed to be different size (like on different distation). Wenn the nearest of them stets like full moon in size, objects stoped and started to moved away and decreased. They disappeared in the dark. All these took 10 min. Wenn I came back to deck cabin, I noticed, that transmitter switched over from 8 to 1 canal itself.

Place of sighting: 4.5 km from Lodeynoe Pole (mouth of strem Kanomka) downstream r.Svir. It is 20 km from Nizhnesvirsky reserve upstream r. Svir.

Date of sighting: Last decada of August or beginnind of september 1989
Sighting time: 22-23 hr

Durations: 10 min

Enviromental Situation:

Viewed from: Outdoors() Indoors() Car() Boat() Other Ship "Becas"

Personal Account:

1. Where were you and what were you doing at the time?

2. What made you first notice the object?

We watched with interest

3. What did you think the object was when you first noticed it?

Something unusiale

4. Describe your reactions and actions, during and after sighting the object.

Pleasure feelings, got energy

5. Describe the object and its actions.

We walked from Lachta to village Kovkenizi. Some distance before the mouth of stream Wajemskij I noticed around our heads and hands whitish-silverish shining. It looked like small twinkling stars. The max distance of lighting from body - about 20 cm. We stayed a little (10 min) and felt, that energy flowed into us (we were tired) and after that very fast reached Kovkenizi. The shining disappeared after leaving "zone". I tried several times to cross the "boundary". Shining was watched only in zone of appr. 50 m distance from stream.

Place of sighting: NSReserve, the chief road on the distance 50 m before and 50 m after mouth of stream Wajemskij

Date of sighting: beginn. of february 1994

We went by boat along Lachta-gulf from vill. Kovkenizi to Lachta. It was dark. We noticed the ray of light. It was like headlight, directed from the road (as it seemed) on the right bank of stream Wajemskij to the gulf. It made halfcircle with about 45 grad. elevation (see sketch). We thought, it was poachers and said to chief inspector (Vichkunin). But the next day was no found any traces of poachers.

Place of sighting: NSReserve right bank of stream Wajemskij, not far from the road.

Date of sighting: august or sept. 1993

Information on Observer

Name of Observer: Vasilij Sosnin
Age (birthday): 1983
Profession: schoolboy
How many other witnesses? 3 (2 class-mate and aunt of one mate)
Did any other Agency contact You? No

Sketch of the object: enclosed
Sketch of the area: enclosed

Personal Account:

1. Where were you and what were you doing at the time?

We were returning home from school.

2. What made you first notice the object?

Began to watch.

3. What did you think the object was when you first noticed it?

UFO-plate.

4. Describe your reactions and actions, during and after sighting the object.

I watched quietly, but after returning home I got in big fright. The woman, which was with us, was afraid and fell down the snow.

5. Describe the object and its actions.

We were returning home from school. In the moment we were crossing the railways (from N to S) appr. in 100 m to E from bridge cross railways (near railway-station Lodejnoje Pol'e). Suddenly we saw in E direction a little shiny "plate" with silver hull (corps). In central part were convexes. Diameter of "plate" was appr. 5 m (as room), height - 2 m. From below - around center - were lights (didn't remember how many) of 3 colors: white (with some light blue), saturated green and red. Lights moved by circle, changing one another in such sequence: white-green-red. From "plate" issued 4 rays of not very bright light of light-blue-white color. 3 of them were directed in horizontal plane, one - vertical upwards. It moved (in silence) horizontally along railways from E to W direction. It had flid just above our heads on the height appr. 200 m. Wenn it reached the bridge, it raised vertically upwards. I didn't notice, where it disappeared. The "plate" flid above the bridge, but there was illusion, that it went under the bridge (don't know why).

Place of sighting: town Lodejnoje Pol'e, appr. 100 m to E from bridge cross railways (railway-station) Date of sighting: dec.-jan. 1994

Information on Observer

Name of Observer: Maria Moshnikova, Anna Lasareva, Sveta Sorokina
Age (birthday): 1984
Profession: schoolgirls
How many other witnesses? 1 girl from their class (Sveta Bojkova) watched this object independently.
Did any other Agency contact You? No

Sketch of the object: enclosed Sketch of the area: enclosed

Personal Account:

1. Where were you and what were you doing at the time?

2. What made you first notice the object?

Watching in turn.

3. What did you think the object was when you first noticed it?

Helicopter or UFO.

4. Describe your reactions and actions, during and after sighting the object.

5. Describe the object and its actions.

We were walking on the glade near river Svir (end of Volodarsko-go-street). Behind the Svir (N direction) flied helicopters with yellow lights. We decided to watch them and brought the binoculars from home. In that time there were not helicopters in the sky yet, but we noticed in the same direction, above the forest, red shiny object. First we thought, it is helicopter, but in difference from helicopter, it didn't give any sound and had not yellow, but red light. We watched through binocular: it was of halfsphere form. Along lower part (diameter) were small circles of grey color. It moved to us (from N), as with acceleration, than disappeared behind the trees. Several times somewhat red-shiny parted from object and fell down. We felt intrest during sighting. Every girl watch UFO with binoculars in her turn.

Place of sighting: Lodejnoje Pol'e, glade near river Svir (end of Volodarskogo-street)

Date of sighting: first decada of january 1996 (vacation)

Sighting time: 21-22 hr

Durations: about 5 min

Enviromental Situation:

I was at home, looked out of the window and saw above forest shining. I called father and together we went out to look - what is it? First I thought - the Moon raised from behind forest. The object resembled the Moon, peeped out through cloud (we saw as 1/2 of "Moon"), but it moved together with cloud. The object was light blue, cloud - white, all this was a little shining. It moved horizontally not high above forest from N to E direction. The speed was comparable with one's of passenger airplane. We watched it 5-7 min. After that it disappeared behind horizon (forest) in E. After it's disappearing not any traces remained in the sky. The sky was clean, without clouds, as usual in good weather in evening.

Place of sighting: Svirstroj. 12 km upstream Svir (to NE) from Lodejnoje Pol'e.

3. What did you think the object was when you first noticed it?
4. Describe your reactions and actions, during and after sighting the object.
5. Describe the object and its actions.

I went outdoors during my duty and noticed, that it is unusual light outdoors. I had a look and noticed in E sharp-bright white (first twinkled) globe. I became to watch and called Maria Vasil'jevna. First we thought - it is helicopter, because it stood in one place, then suggested - UFO. We were a little anxious. The object began to move and did so during 1.5 hr - very slowly, smoothly, without turning and jumping. It moved in SE direction from river Svir to the end of take-off and landing strip of military airdrome. Then the globe stretched into ellipse and forward of it got seen the cone. After that 2 bright-red rays of light appeared (direction - to ground). In several sec - they were took away. This action repeated 2 times else. Then object (returned?) and took star-form. Till 7 hr the object moved slowly to SE, then it melted in air, disappeared without traces, but not behind the horizon.

30 min I
III
May be, there was no connection, but that day the conflagration of sheds was in direction of globe near Svir.

We came that place for fishing. In the forest stood our car, in which were sleeping 8 fishers. I came to Ladoga coast near mouth of stream Zubez. There was big storm. Suddenly I saw ahead, above waves of Ladoga, fire-globe. First thought was - it is not similar to Moon or globe-lightning! The light was white-yellow, not sharp, pulsating. The ball hanged over the water in hight 50-100 m, in 200-300 m from me. It stood in one place, moved down and up on appr. 10 m interval (during 3 min it did so 5 times), moved on the left and on the right parallel to water-surface. It moved very slowly, quietly, smoothly. I felt fear, then horror - my hair stood on end. After 3 min of watching I went out to the car. Fishers were fast asleep. I said nothing to anybody and else 3 year after it I kept silence about it (was unpleasant feeling).

Place of sighting: territory of future NSReserve, near mouth of stream Zubez (now square 116), coast of Ladoga.

Date of sighting: beg. of october 1978

UFO Sighting Questionnaire N 31
General Cases (Form 1)

Name of investigator: Marina Stolyarskaya, Galina Troshkova.
Street address: zapovednik
Town: Lodeynoye Pole. Region: Leningradsky. Zip code: 187710
Country: Russia

Information on Observer

Name of Observer: Andrej Farisejev
Age (birthday): 1958
Profession: dispatcher
How many other witnesses? 2 (guards, don't know their names)
Did any other Agency contact You? No

Sketch of the object: enclosed
Sketch of the area: enclosed

Personal Account:

1. Where were you and what were you doing at the time?
2. What made you first notice the object?
3. What did you think the object was when you first noticed it?
4. Describe your reactions and actions, during and after sighting the object.
5. Describe the object and its actions.

I went outdoors to breath by fresh air. In the E part of sky I noticed a strange star and brought binocular from dispatcher-room. Object was like big bright star, from which moved analogic to rays several red points to different sides. After points remained traces. To NW direction object issued the bright light, like projector. "Star" stood in one place. I thought, that it was UFO (watched the Earth) or military-object of Russia or other countries.

Place of sighting: Lodejnoje Pol'e, N part, near Svir, SRGS
Date of sighting: 18.10.96 Sighting time: 7 hr Durations: 3 min
